WATER TESTING EQUIPMENT • •

 $Legionella\ bacteria, in\ special\ Legionella\ pneumorphila\ serogroup\ 1, is\ a\ harmful\ threat\ with\ a\ mortality\ rate\ of\ properties of\ properties of\ properties of\ properties of\ properties\ propert$ up to 30%. Once Legionella are inhaled (droplets in the air), they grow in human lungs and can cause Pontiac fever or even Pneumonia (Legionnaire's disease). The issue with current method (culture) is that it takes up to 14 days to let Legionella grow on a petri dish to be visble and countable, which is far too long to take effective actions

Legipid® on PrimeLab takes a different approach:

As with the culture method, Ilitre of water is filtered to collect the Legionella. After the Legionella are released from the filter, a patented reagent is added that contains micro-bits with a magnetic core covered with an antibody. Only living Legionella Sp. (no false positives!) are captured by the antibodies. After several washing steps, a colour tracer, also linked to an antibody, is added, which binds with the Legionella Sp. already bound to the micro-bit. This makes viable Legionella visible (pink colour) to be detected by PrimeLab. PrimeLab recognises the colour and converts it to 60 – 10^6 cfu. As PrimeLab is connected via WiFi|USB|Bluetooth® to a free software and app, both of which are synchronised via the cloud, reporting is very easy. In addition, $Prime Lab \, can \, perform \, more \, than \, 140 \, different \, parameter \, methods \, from \, ammonia \, to \, zinc. \, A \, true \, "one \, for \, all".$

No matter if just one or many Legionella tests are performed at a time/in parallel, only one set of reagents is needed to perform a CONTROL/ZERO. By that, a Legipid kit, 10 is good for at least 5 tests (only one test at a time) or a maximum of 9 tests (if 9 tests are performed in parallel). Nevertheless, one LG-MP4-rack (cuvette holder with magnet) can handle up to 3 tests + 1 CONTROL, Basic kit* provides 1 x LG-MP4-rack (max 3 tests in parallel, Professional kit* provides 5 x LG-MP4-rack (max 19 tests in parallel).
