## Technical Data OTT SVR 100

## Surface Velocity Radar for Measuring Open Channel Flow

- Usage Type
  Fixed installation
- **Product Highlights** Identify data influenced by sensor movement (e.g., wind, traffic) using meta data from integrated vibration and tilt sensors
- Application fields Non-contact surface velocity radar
- Internal data logger No
- Measurement range 0.08 ... 15 m/s (0.26 ... 49 ft./s)

OTT SVR 100 is a simple, non-contact, compact surface water velocity radar sensor. Designed for measuring flow in open channels and rivers where reliable velocity data is required continuously, during floods or periods of high concentrations of suspended sediments.

The sensor is mounted above the water surface, away from floating debris using a flexible bracket for vertical or horizontal installation. Velocity measurements and sensor status information from the integrated vibration and tilt sensor is available via SDI-12 over RS-485 and Modbus. It is also compatible with OTT Prodis 2 software for system calibration.

## **Technical Data** OTT SVR 100

| Measurement device for         | Contactless velocity measurement                             |
|--------------------------------|--|
| Measurement Range*             | 0.08 15 m/s (0.26 49 ft./s)                                  |
| Medsurement Runge              | * Depending on flow conditions                               |
|                                |  |
| Resolution                     | 0,1 mm/s , (0.0001 ft)                                       |
|                                |  |
| Accuracy                       | ± 2% of measured value<br>12° Azimuth                        |
| Radar opening angle            | 24° Elevation  |
| Detection distance             | 1 50 m (3.3 164 ft.)   |
|                                |  |
| Distance to water              | 0.5 25 m (1.64 82 ft.)                                       |
| Deductor                       |  |
| Radar frequency                | 24 GHz (K-band)  |
